EIMSKIP

Q3 2026 Highlights

Good financial performance in the quarter and improvement YoY, despite challenging environment with continued cost pressure from significantly elevated oil price. Stronger core operations, higher volume and continued execution of efficiency initiatives drove the improved results.

EBITDA ↑ 43.6%

Q3 2026	Q3 2025
EUR 29.3m	EUR 20.4m

Growth across all segments

Revenue increased by 19.4% in Q3 YoY. Higher revenue and improved results across all business segments.

Successful changes were made to the sailing system in Q3, with the new Purple line and Orange line adjustments addressing customer needs and competition.

Operational improvements

Efficiency initiatives, outlined in the second half of 2025, delivered EUR 3.3m in realized benefits in Q3, with an EBITDA impact of EUR 2.9m. YTD benefits total EUR 9.4m, with EUR 8.0m in EBITDA impact.

Higher activity weighed on cash flow

Higher activity during the quarter increased working capital and impacted cash flow, with a more balanced development expected in Q4.

Surge in oil prices impacts costs across the value chain

Market prices up 78% YOY

Vessel operations

- Bunker expenses increased by EUR 6.1m YoY, or 56%, below the 78% increase in average market prices, mainly due to the timing of bunker purchases.

Global freight rates

- Higher bunker costs contributed to elevated freight rates from deep-sea carriers.

Inland transportation

- Higher fuel prices increased the cost of both own and third-party trucking.

Ports and terminals

- Fuel costs increased expenses of cargo-handling equipment and other port-related operations.

Other purchased transportation and third-party expenses

- Higher energy costs also led to increased cost of vessel chartering, feeder services, air freight and other logistics suppliers.

Inflation

- Higher oil prices have added to inflationary pressures across key markets, creating additional cost pressure.

Food and food-related volume provides a solid foundation for Liner services

Logistics and agency services

Logistics and agency services represent trucking and distribution, warehousing, cold storages, own terminal operations and Agency.

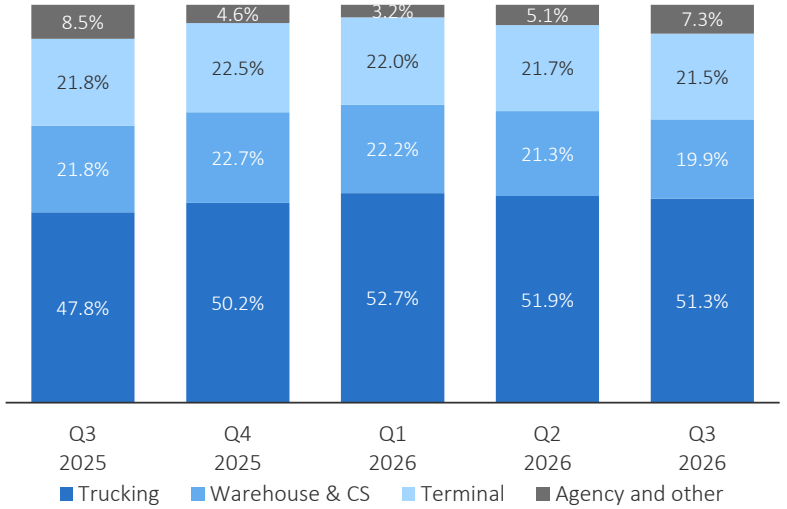

Various services offered across 30 locations in 11 countries.

Logistics and agency segment

Investments in trucking and warehousing improving performance

Logistics activity remained broadly stable during the quarter. Stronger trucking activity in Iceland and good warehouse activity, including the new cold storage in Denmark, improved results. Good results in Agency although affected by fewer cruise calls compared with Q3 2025.

Financial results

Income statement Q3 2026

Strong volume and benefits from efficiency initiatives drove improved profitability.

Revenue increased by 19.4%, driven by higher volume, elevated global freight rates and bunker surcharges.

Expenses rose by 16.7%, largely in line with increased activity levels, higher third-party freight rates and a significant increase in bunker prices.

Salaries increased by 4.6% or EUR 1.8m YoY. Currency fluctuation had a EUR 1.0m impact on salaries, mostly due to the weaker EUR against the ISK and NOK. Excluding the FX effect salaries increased by 2.0%. Average FTE in the quarter were 42 lower than in the same period last year.

Good EBITDA result reflects efficiency initiatives implemented during the year and favorable volume development coupled with higher global freight rates. EBITDA comparison with Q3 2025 is impacted by a EUR 2.9 million loss on the sale of Lagarfoss last year.

Depreciation increased by EUR 1.0m, primarily due to investments in the logistic segment.

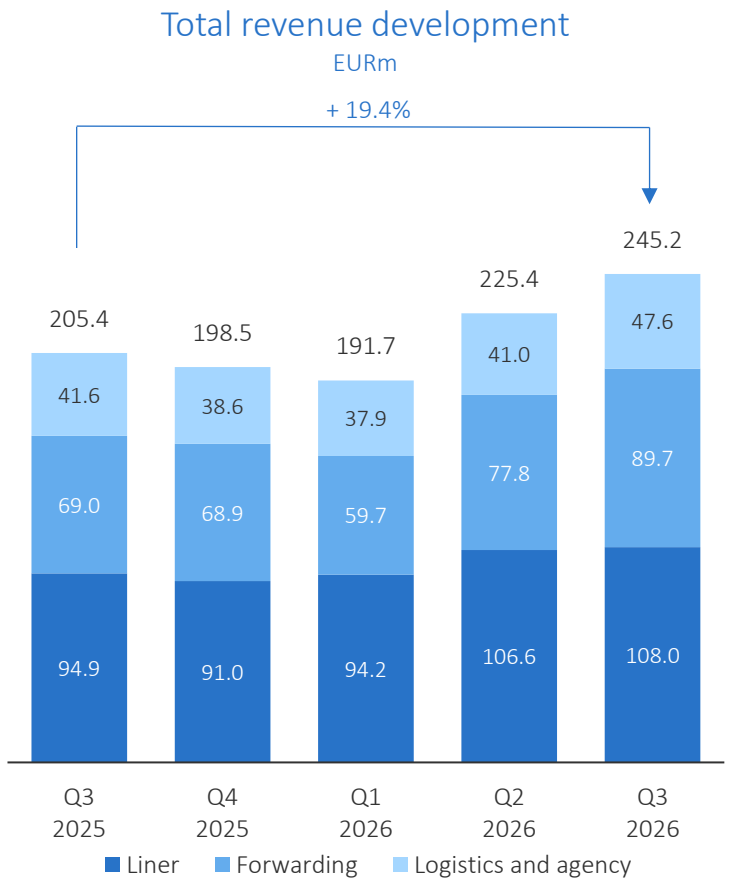

Strong performance from affiliates, contributing EUR 7.3m compared with EUR 3.5m last year, primarily driven by a gain on Elbfeeder's vessel sale in July. Elbfeeder sold a second vessel in September, with the combined impact of the two transactions on Eimskip expected to be approximately EUR 12m across Q3 and Q4 2026.

Revenue and expense analysis

Broad-based revenue growth while increase in expenses was driven by surge in bunker prices

Revenue growth was broad-based across all segments, supported by higher volume and global freight rates.

- Liner revenue increased by 13.8%, driven by increased volume and bunker surcharges reflecting the surge in bunker prices.
- Forwarding revenue increased by 30% with higher global freight rates and growth in volume. Asia trades showed particularly strong growth.
- Logistics and agency revenue was up by 14.4% primarily driven by increased trucking activity in Iceland.

Expense growth mainly reflected higher activity level and external costs, particularly third-party freight rates, bunker expenses and land transportation costs.

Liner and equipment expenses increased mostly due to insourcing of trucking and investments in new reefer containers.

Salary expenses was impacted by currency fluctuations.

The increase in expenses was partly mitigated by successful delivery of efficiency initiatives with an EUR 2.9m effect on EBITDA.

EBITDA

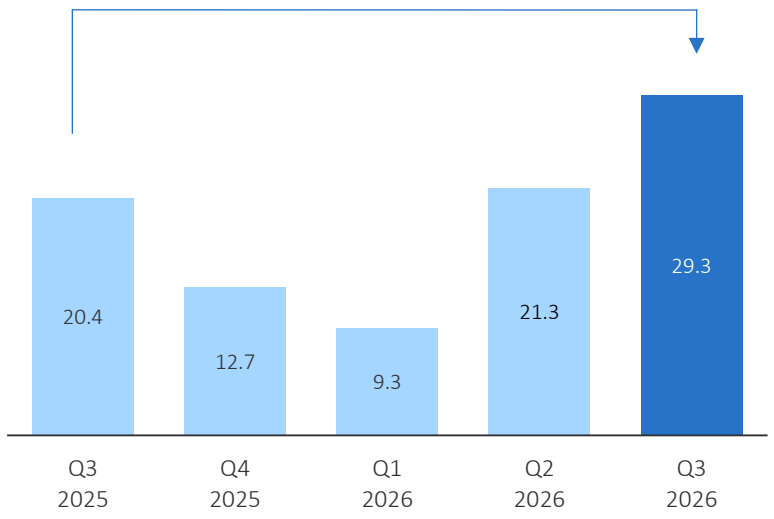

Good results in the quarter. Reflects volume development and improved operational efficiency leading to increased contributions across business segments.

EBITDA development by quarter

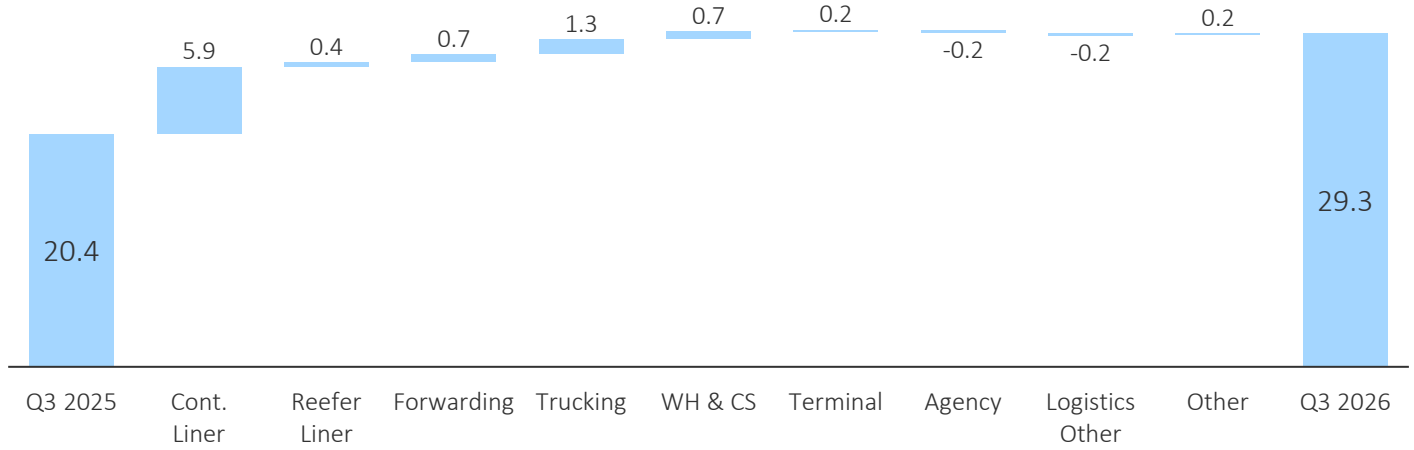

EURm

Maintenance capex in line with plan

Maintenance capex
EURm

New investment capex
EURm

Maintenance capex amounted to EUR 22m YTD.

The main investments are primarily related to vessel dockings, equipment renewals and IT investments.

IT investments were EUR 1.8m higher YoY, reflecting the rollout of a new sales and service platform for the container liner business.

New investment capex amounted to EUR 6.6m YTD.

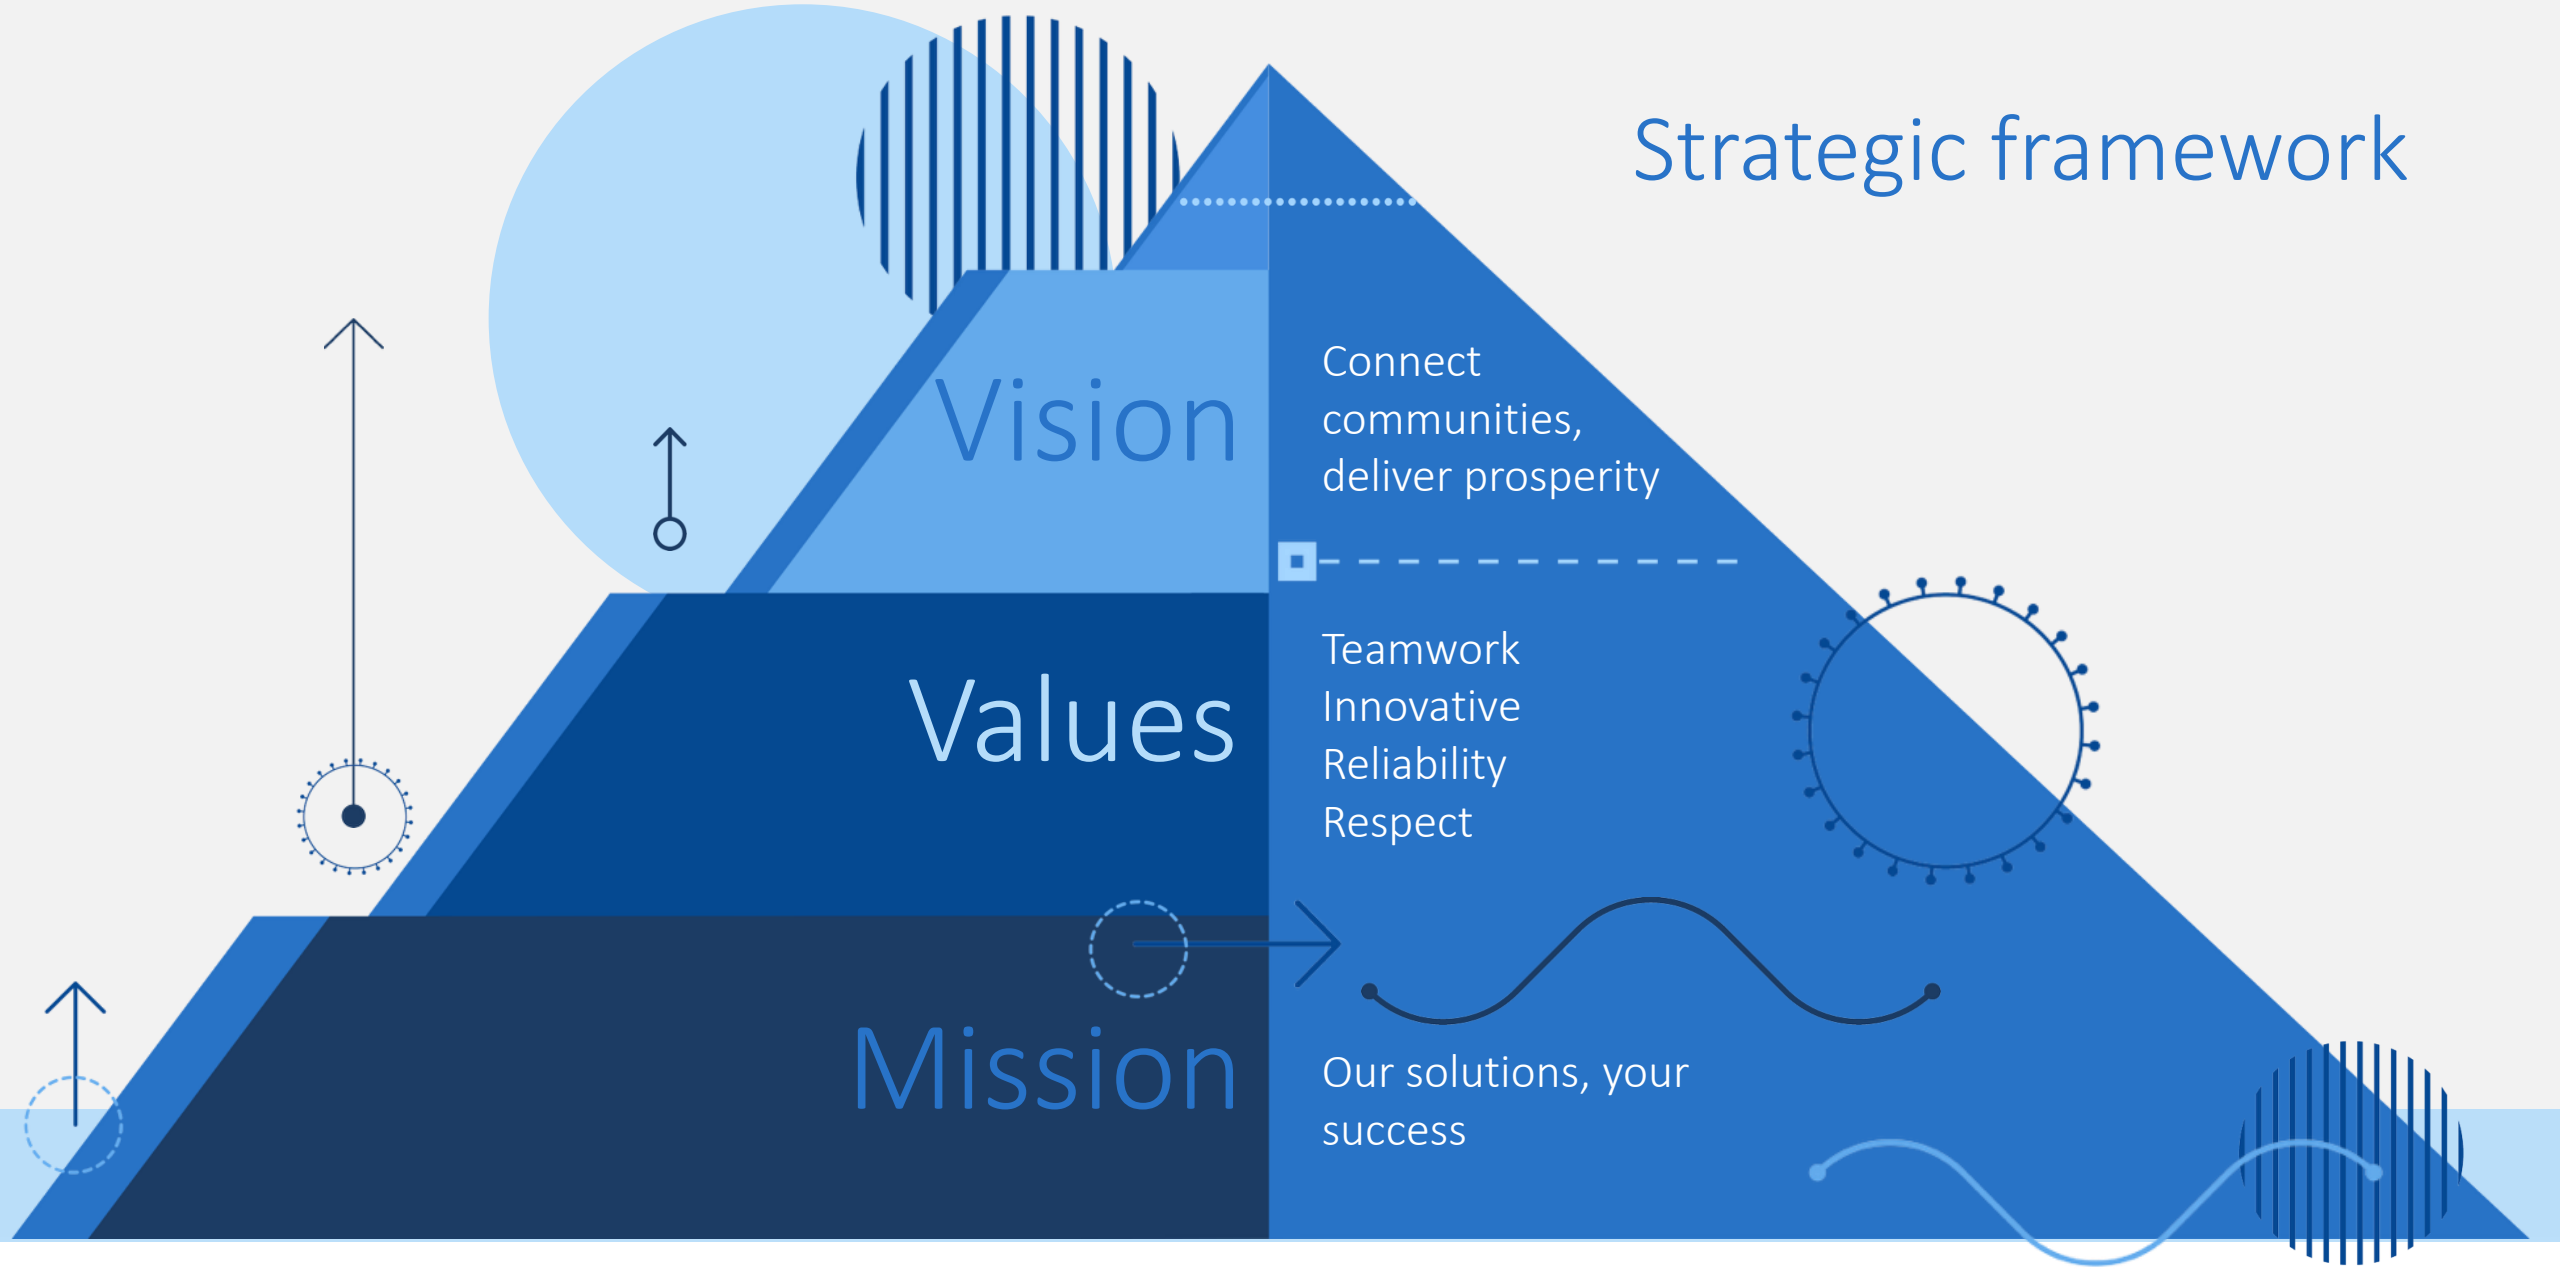

Investments mainly related to expansion of the trucking fleet, completion of the Sundahöfn washing facility, office and warehouse refurbishments.

Preparations for a new distribution centre in Selfoss progressed during the year, with investment expected to increase towards Q4 and well into 2027.

Jakinn
42 years of service

Eimskip's investment in the gantry crane Jaki in 1984 represented a major capital commitment and a breakthrough in operations in Sundahöfn, substantially reducing vessel loading and discharging times.

More than four decades of service demonstrate the lasting value of the investment and the benefits of preventive maintenance.

As Jaki retires,
we thank it for
its services!

Sundahöfn International Marine Terminal delivering significant operational efficiency gains

Higher productivity and smarter resource utilisation are translating into a leaner and more efficient operation.

Q4 Outlook

Q4 Outlook

Solid activity expected across all three business segments in Q4, with traditional seasonality.

Iceland import volume is expected to be somewhat higher than last year, supported by full production by Nordurál and solid consumer goods volume. Export from Iceland is expected to remain strong albeit a seasonal slowdown at the end of the quarter. Volume driven by salmon and water exports to the US and a good herring season. Nordurál has now reached full production levels.

Trans-Atlantic volume is expected to remain at Q3 levels and above Q4 last year, with higher average rates compared with Q3.

Volume in Norway is forecasted to be higher than last year despite reduced quotas, supported by whitefish inventories in Norway destined for markets.

Fresh seafood export from the Faroe Islands, particularly salmon, continues to benefit from the new weekly direct Thorshavn–Rotterdam service, while lower pelagic volume is expected due to reduced quotas. Import volume is expected to remain broadly stable.

Forwarding volume is anticipated to be higher than last year, with rates remaining broadly stable. Capacity constraints from Asia to Europe could, however, limit further volume growth.

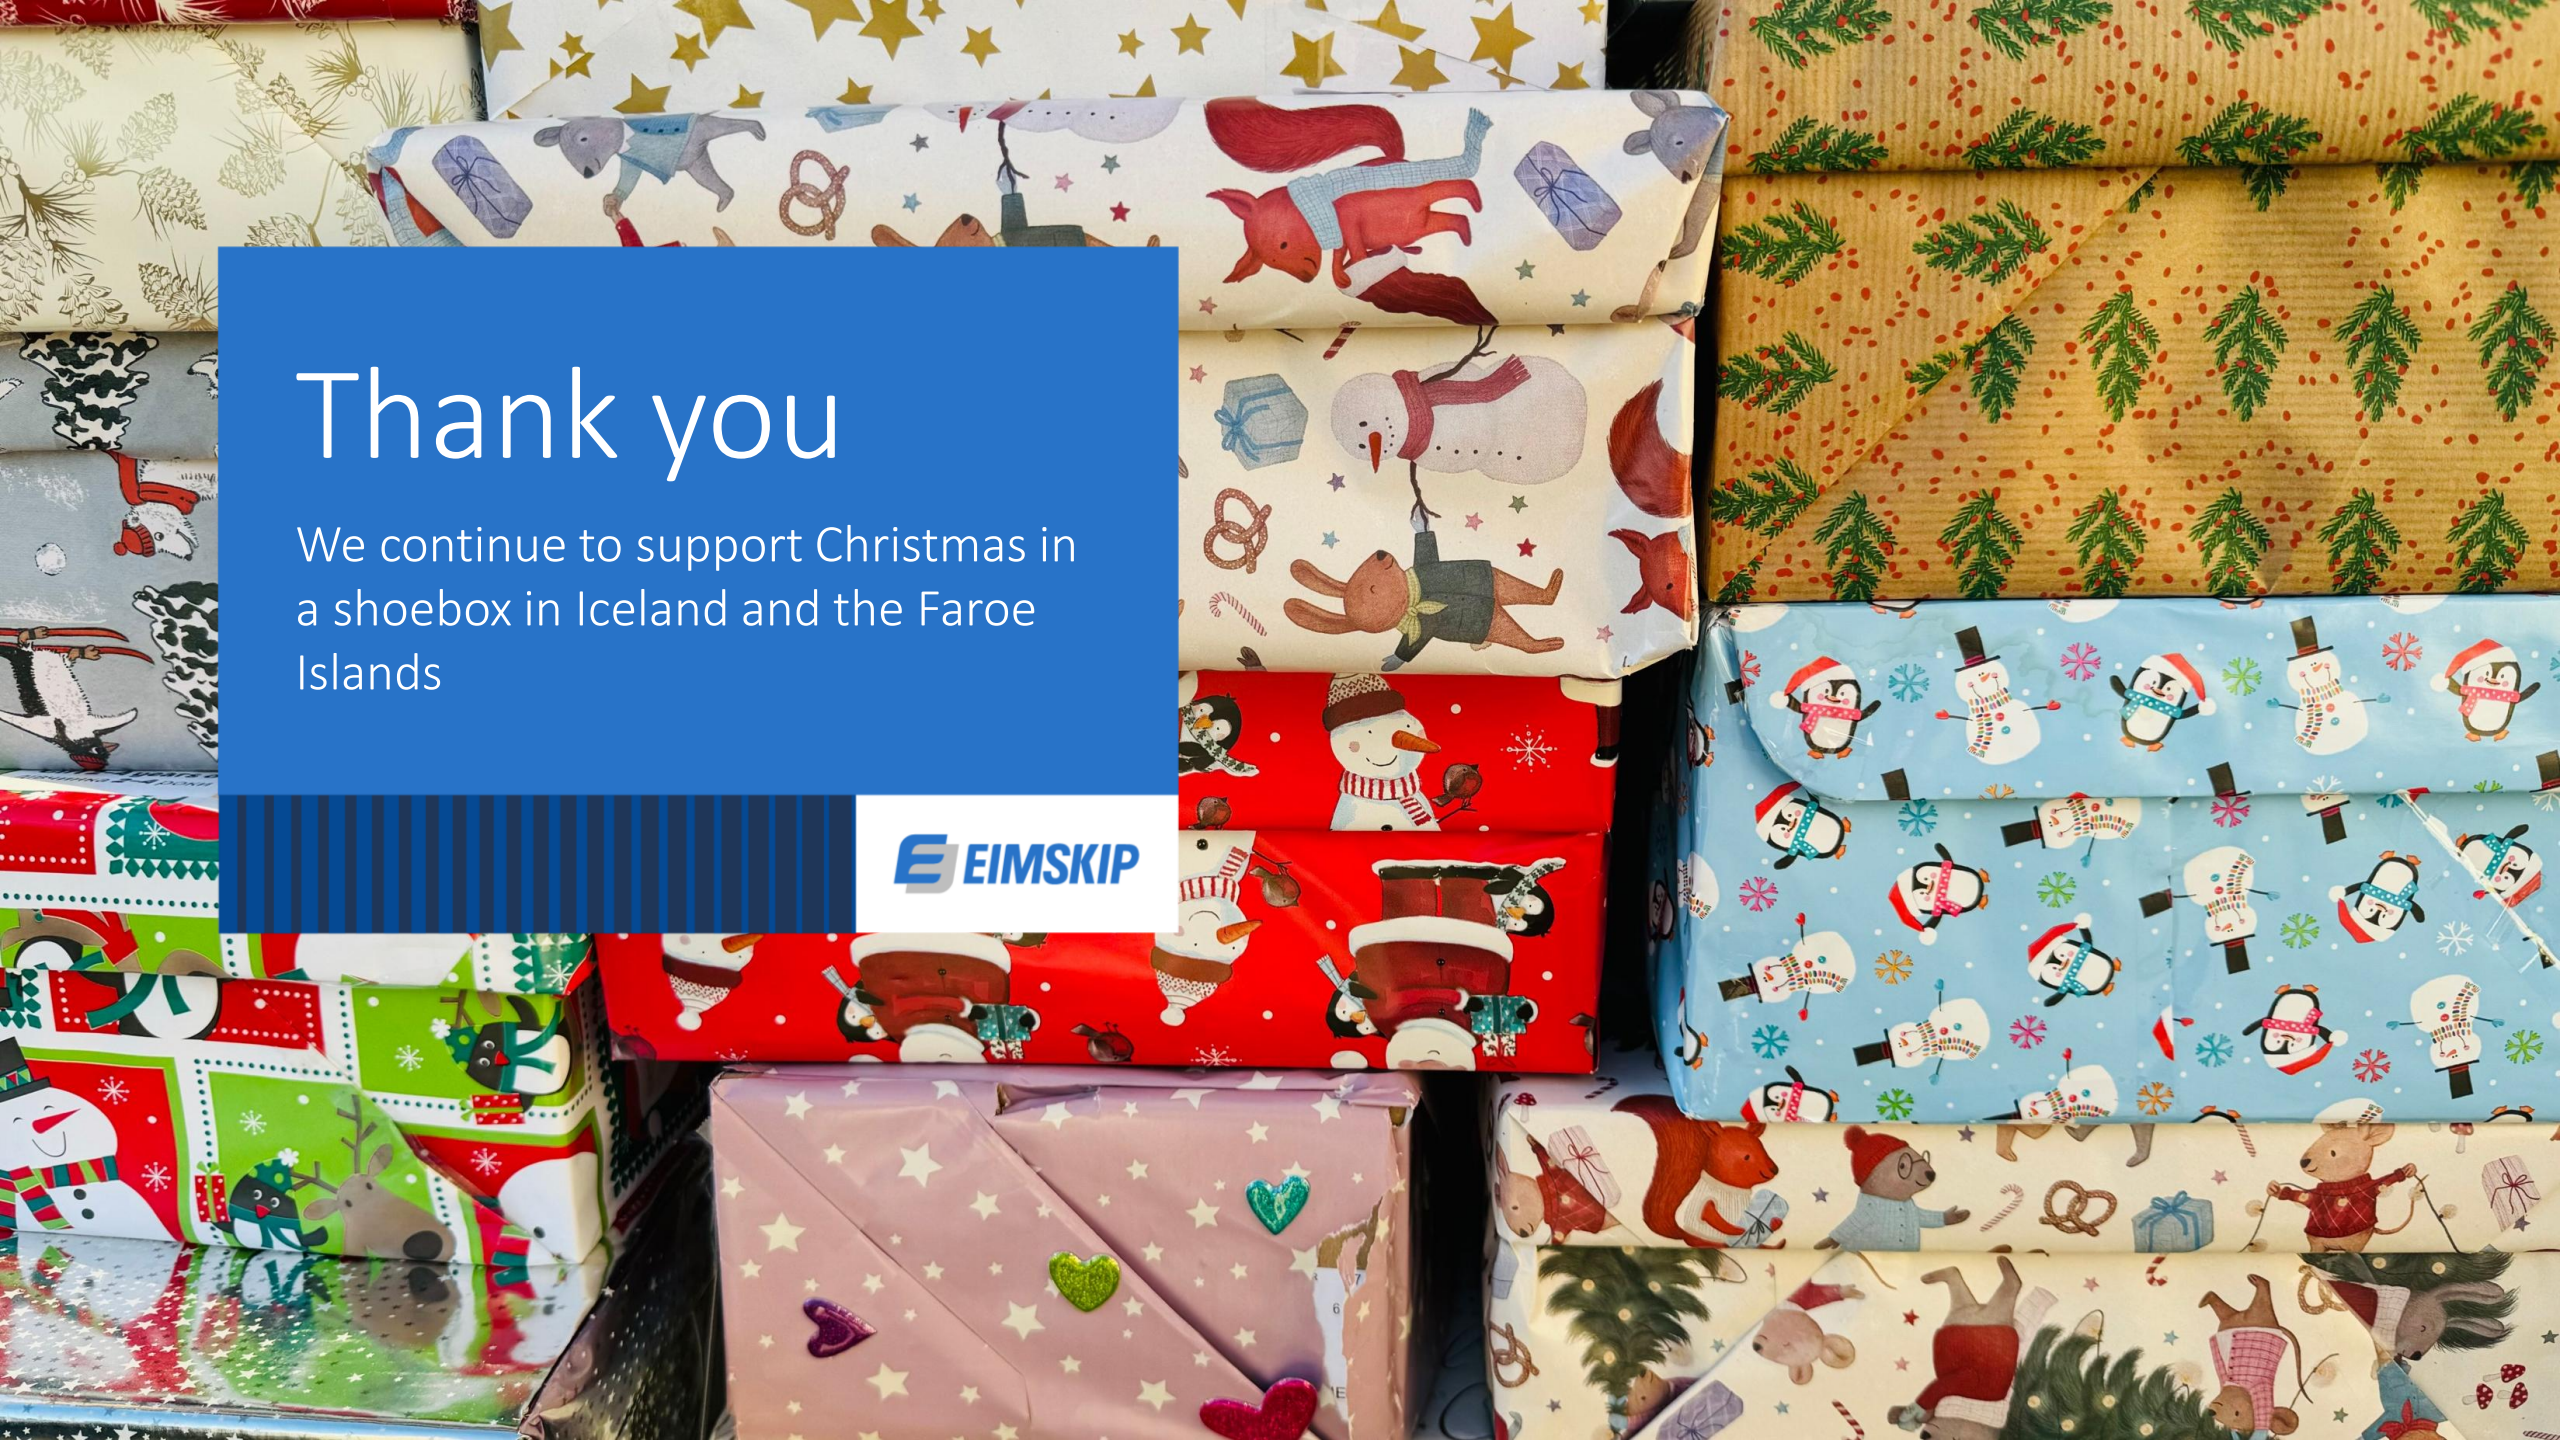

Trucking activity is expected to seasonally soften, partly offset by Christmas-related volume and solid seafood activity.

The warehousing outlook remains positive, supported by increasing storage volume towards year end, while cold storage activity in Norway and the Faroe Islands remains challenging due to lower stock levels.

Terminal activity is expected to remain positive, supported by normalised Nordurál volume and new direct line between Thorshavn and Rotterdam.

Continued strong performance from affiliates expected. Elbfeeder sold a second vessel this year in September, with a combined impact on Eimskip expected to be approximately EUR 12m across Q3 and Q4 2026.

EIMSKIP

Thank you

We continue to support Christmas in a shoebox in Iceland and the Faroe Islands

Disclaimer

Information contained in this presentation is based on sources that Eimskipafélag Íslands hf. ("Eimskip" or the "Company") considers reliable at each time. Its accuracy or completeness can however not be guaranteed.

Copyright of information contained in this presentation is owned by Eimskip. This presentation, including information contained therein, may not be copied, reproduced or distributed in any manner, neither wholly nor partly.

This presentation is solely for information purposes and is not intended to form part of or be the basis of any decision making by its recipients. Nothing in this presentation should be construed as a promise or recommendation. Eimskip is not obliged to provide recipients of this presentation any further information on the Company or to make amendments or changes to this publication should inaccuracies or errors be discovered or opinions or information change.

Statements contained in this presentation that refer to the Company's estimated or anticipated future results or future activities are forward-looking statements which reflect the Company's current analysis of existing trends, information and plans. These forward-looking statements are subject to a number of risks and uncertainties that could cause actual results to differ materially depending on factors such as the availability of resources, the timing and effect of regulatory actions and other factors. Eimskip undertakes no obligation and does not intend to update these forward-looking statements to reflect events or circumstances occurring after this presentation. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this presentation. All forward-looking statements are qualified in their entirety by this cautionary statement.

By the receipt of this presentation the recipient acknowledges and accepts the aforesaid disclaimer and restrictions.
